

Dear Africa fans...

...and those who want to become one. Africa is vastness, independence, adventure, a feast for the senses; Africa is finding your true self. But what is Botswana? Botswana shows us Africa as we imagine it – vast savannahs, landscapes criss-crossed by rivers, camel thorn trees where elephants shake the ripe fruit from the trees, and beneath the next tree lies a pride of lions seeking shade from the scorching sun. And us? We are right in the middle of it all, right in the middle of the world's largest transnational national park, called the KAZA Project. We are right in the middle of the Okavango Delta World Heritage Site. Incidentally, the KAZA Project has connected huge wildlife reserves in Angola, Botswana, Namibia, Zambia and Zimbabwe via migration corridors, along which wild animals travel through the savannahs on historic migration routes, as they have done for centuries, without being stopped by national borders and fences.

We set up our private camps in the midst of this incomparable natural environment. We have put together seventeen safari tours for you in 2026 that will show you the uniqueness of Botswana. We do not spend our time on asphalt roads that run for hundreds of kilometres around the parks. We are drawn directly to the national parks, directly to the pristine wilderness, where we stay with our guests in private luxury tented camps, set up by our team directly in the national park or in private concessions. No fence separates us from nature, surrounded by the sounds of the savannah. In the background, the lion roars while you slumber in your beds. Of course, you will be provided with all-round service. Our safaris are all-inclusive, with all meals and available drinks included! It's pure adventure, hardly any different from the first adventurers in this area

at the end of the 19th and in the 20th century, except that Hemingway's gramophone is not part of our safari equipment.

When is the best time to travel? The answer is simple – anytime. Whether it's the rainy or dry season, every season has its own special charms. Some people are put off by the word 'rainy season', but in Botswana, the rainy season only means short, heavy showers on 8 to 10 days a month. In return, nature rewards you with the most vibrant shades of green and countless young animals, providing fantastic photo opportunities. The rainy season begins in November and ends in March. Temperatures range between 30 and 35 °C during the day and between 18 and 23 °C at night. The rest of the year is dry season, when there is hardly any rain. Temperatures range between 25 and 30 °C during the day and between 8 and 15 °C at night, rising above 20 °C in October. As the dry season progresses, the landscape becomes increasingly yellow and the animals are drawn to the remaining waterholes. This makes it easier to capture them on camera. Incidentally, the best photos are taken in the hour after sunrise and before sunset, which is exactly when 'participatory safaris' set up and take down their tents.

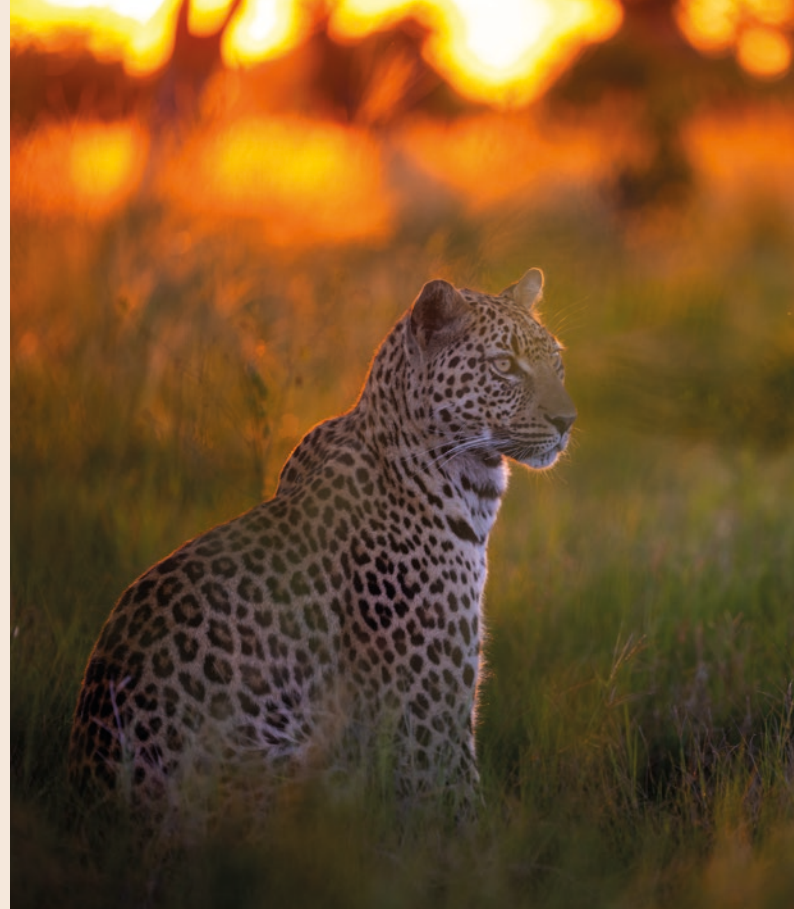

Experience it for yourself and join us on one of our fantastic tours!

We have combined our luxury tented safari with classic lodges in Maun and Victoria Falls, because this World Heritage Site, just like the Okavango Delta, should not be missed on our tour. Bed and breakfast is included in the tour price.

A warm welcome to Botswana

Discover Botswana, a jewel in southern Africa between South Africa, Zimbabwe and Namibia. As one of the most untouched and exclusive safari destinations, it offers incredible biodiversity and unique nature. Experience luxury amidst wildlife and crown your trip with a visit to the majestic Victoria Falls in Zimbabwe.

Our tours traverse Botswana's two most famous national parks. Tour A takes us from Maun to Victoria Falls, while Tour B starts in Victoria Falls and ends in Maun. Both tours pass through Chobe National Park and Moremi Game Reserve. You will stay at exclusive campsites right in the national park. You don't have to forego luxury, as the safari accommodation is hardly inferior to a classic lodge, with the greatest luxury being the breathtaking natural surroundings.

We live Botswana!

Kristin & Dirk Meißner

On one of our group trips to South Africa, on the cliffs of the Cape of Good Hope to be precise, the idea and desire to make Africa more central to our lives developed. During our honeymoon in southern Africa, we visited Botswana – we immediately fell in love with this country, its people and its unique rhythm of life. Nowhere else have we been more successful in reconnecting with our basic instincts and letting go of the stress and strain of everyday life.

We would like to share our experiences with as many people as possible. Our first trip to Botswana was followed by many more tours, some alone, some as accompanied groups.

Botswana is a fantastic place to track down four of the Big Five (elephant, lion, leopard and buffalo) in the wild. Rhinos can be admired in specially protected areas on request. Botswana, especially the Okavango Delta, is one of the most species-rich areas on earth. With approximately 150,000 elephants, it is home to the largest population in the world. This corresponds to approximately 40% of the total population.

Where else but here can guests experience their 'moments'!

Moments are those moments in life that remain unforgettable...
